

THE PRESENT MOMENTS AND THE END TIMES

Zyomara Briseida Delgado Reynoso

Gnostic Anthropology Teacher, Moscow, Russia.

Mexican Deputy of World Philosophical Forum

Three Star Paper

Article

Universal History is demonstrating that the law of evolution is very linked with the involution. We as humanity believe that we are super civilized because we create technology that makes our life easier but we are destroying our planet. During the last century, we experienced two world wars, enumerable atomic bomb tests in different places, new destruction systems are created year after year, pollution, diseases and misery governed everywhere.

Almost all human and conscient values are being lost and the mechanical and materialistic system of life has provoked self-destruction all over the world. The atmosphere is polluted with smog, not only in the big cities but in the fields, in the mountains, everywhere. Some scientists have said that "if this smog continues, before 40 or 50 years, an enormous amount of humanity will have perished," due to smog. The rivers are polluted, the fish have disappeared; one no longer finds rivers of pure water of life where one could bathe, they are all polluted!

The seas have been turned into huge garbage dumps and marine species are disappearing due to pollution. The entire Earth, which once produced rich fruits in abundance to sustain all creatures, is becoming sterile. Now when one travels over huge expanses of land we see that these are turned all into desert. Chemical fertilizers (apparently magnificent) eventually end up sterilizing the fields. At the rate we're going, and according to the law of entropy, everything will soon be equalized. If we think of ourselves..., if we don't work on ourselves, if we don't fight to transform our minds, to transform our emotions, a day will come when we will all be equally perverse and there will hardly be any difference between person and person, we will all have equalized according to the law of entropy. Thus, the entire Earth, all of it, is headed towards becoming a new moon, and we, all of us, devolving, with our disordered minds, with our bestial animal passions, with these desires or emotions of an inferior type, since we do not work on ourselves (I am speaking this time on behalf of all humanity), obviously, the day will come when we will be equalized and there will hardly be any difference between person and person, we will all be terribly perverse. That is the law of universal entropy...

Sacrifice

A transformation of the Earth and of humanity is needed. First of all, it is good to understand that we are in moments of world crisis and bankruptcy of all conscient principles. We are faced with the dilemma of to be or not to be of philosophy. These are moments of unspeakable anguish. It becomes urgent, therefore, to comprehend what the path that will lead us to true happiness, peace and hope must be...

But this transformation is only possible through a great sacrifice, through a great holocaust. Only through sacrifice is it possible for a lower energy to become an energy of a higher and different kind. So, sacrifice is indispensable to transform an inferior force into something else, into something higher and different. If the Earth did not go through a great catastrophe, if there were not that catastrophe; if everything we are saying here turns out to be false, then the whole Earth (and in a short time), would be turned into a new moon: the marine species would die from pollution; the entire humanity would disappear due to contamination and hunger, the present lands turned into sand, into a Sahara, into a desert; All life would be impossible and the law of entropy would be in charge of equalizing everything, until making this planet a new moon, one more moon... The current Earth is dying! And the most serious thing is that humanity does not realize it: do not realize that species are dying in the seas; do not realize that the species are disappearing in the rivers; do not realize that our world is being sterilized, that it is agonizing... Add to that the underground atomic explosions. But we do not want to realize that this great Earth organism is agonizing, that its end is near; we do not realize it. how asleep this humanity is!... It is necessary for this Earth to return to the chaotic state, to chaos, so that a new regenerated Earth emerges from that chaos.

So, the end times have arrived, and we are in them! Before the great catastrophe that is coming, there will be many wars to the death and suddenly bloody revolutions will come in different nations of the world, and the third world war will come, and it will be like a true atomic holocaust; Diseases will multiply everywhere and there will be no way to cure them. Due to the abuse of atomic physics, there will be a moment when the decomposition of the chain atom will come, and scientists will not be able to control it... In those days people will walk the streets like crazy, because nuclear energy will contaminate the phosphorus of the brain, and half-insane people will make

Dantesque, Machiavellian, horrifying scenes appear on the world stage... We are on the eve of a great cataclysm; that is obvious. Scientists already know that a world they call the Red Planet, we gnostics call it Hercolubus, and it is approaching the orbit of our planet Earth. It is approaching, and scientists will try to drive it away with nuclear explosions, but all will be in vain. When Hercolubus gets too close, huge waves will be attracted precisely by the magnetic force of that planet; waves of the immense sea, waves like never before seen and will hit the beaches, and a strange sound will come out from the bottom of the oceans... Fortunately, with the maximum approach of Hercolubus, this Dantesque tragedy will end and the end point will be marked for the Aryan root race (which is our present root race, which is named Aryan)... The seas changing beds will definitely submerge the continents in the deep bottom of the oceans. This is not the first sacrifice there has been on our planet, Mayas in Mexico mention about the Katun 13 in their Prophetic book: "Chilam Balam" these types of catastrophes coming in 2043, aztecs wrote about them in the solar stone. Here in India also explained that the ancient earth, Atlantis, perished by water. The Satapatha Brahmana recounts how Manu was warned by a fish, to whom he had done a kindness, that a flood would destroy the whole of humanity. He therefore built a boat, as the fish advised. When the flood came, he tied this boat to the fish's horn and was safely steered to a resting place on a mountaintop. When the flood receded, Manu, the sole human survivor, performed a sacrifice, pouring oblations of butter and sour milk into the waters. After a year there was born from the waters a woman who announced herself as "the daughter of Manu." Fortunately, this time our race Aryan everything is foreseen, there will be a place for the selected nucleus that will serve as the foundation for the future sixth root race. Time has come to regenerate ourselves, to stop being what we are and transform till we achieve perfection. Although we believe each and every one of us to be very holy, the truth is that we are not; rather, although it may seem incredible, deep down, we are all terribly evil...

A time will come when all the prophecies will have to be fulfilled. Muhammad already spoke clearly, he spoke of the earthquake that has been in store for us since the beginning of time. He literally says that then the mountains will be crushed and blown into the air, falling to dust. This invites us to reflect. This would be impossible if there were no earthquake. But why would that earthquake happen? Undoubtedly, such an event would only occur with the approach of a gigantic world, and that is precisely what will happen. The Apocalypse also tells us of a great earthquake, as great—it says—as ever seen on the face of the Earth. I want you to reflect deeply on the moment we are currently in. Truly, we live in a difficult time. We are in the end times, as the Apocalypse of St. John says; we are at the beginning of the end of the era. And... our present earth, the present one, will be destroyed by fire. Peter spoke clearly about this. In his Second Universal Epistle, he says that the Earth and the works that are in it will be burned with fire. And that is true, the elements, burning, will be dissolved.

How to transform ourselves and change our destiny?

Humanity is living in difficult times, lacking inner light and consciousness. Samael Aun Weor, founder of our institution Gnostic Movement explained in his books and conferences that we can change our level of consciousness. When we come into the world, we all have in existence three percent of consciousness and ninety-seven percent distributed among subconsciousness, infra-consciousness, and unconsciousness. However, we must emphatically affirm that as long as any subjective element exists within ourselves, the consciousness will continue to be bottled up within such elements that constitute the Ego, the I, the Myself and therefore it will not be able to enjoy continuous and perfect illumination. When the Ego dies, the consciousness awakens to see the reality of all the phenomena of nature as they are in and of themselves.

I Hope many people all over the world understand the necessity to awaken and create new systems of education based on pure science and spirituality established on consciousness. Giving to our humanity an opportunity to change our destiny.

Summary: The Present Moments and the End Times

The end of this race that perversely populates the Earth today could be brought forward, without even waiting for cosmic events like that of the Red Planet: Hercolubus. Since justice always exists, mercy exists alongside it, the end could be brought forward or delayed. However, cosmic events cannot be brought forward or delayed, as they obey celestial mechanics. Hercolubus will appear in its time, and if humanity has not changed for the end, especially if humanity matured spiritually, all of it would be taken to safe places (as has been done before, such as in Atlantis or Lemuria, where they lived for millions of years, although Hercolubus passed every 25,968 years).

The Katun 13 of the Mayans. If we carefully read the Chilam Balam (the Mayan prophetic book), we will realize that they also speak of the advances of human perversity as determining the end, and they do not give a chronological date. Although the Mayans say that Katun 13 WILL BEGIN in the year 2040 or 2043, they do not claim that this will be the date of the end. Rather, from that moment on, the beginning of Katun 13 may be the end. However, Katun 13 is not a period of time determined by a certain number of years. Rather, Katun 13—like the previous 12 katuns—is determined by how we behave morally, spiritually, and internally. What is truly important is the awakening of Consciousness so we can change our destiny.

About the Author

Zyomara Briseida Delgado Reynoso was born in the city of Toluca, Mexico, on January 12, 1978. Graduated in Law. 1999-2001 Professor at 3 universities in Toluca and co-founder of the organization “Family Circles for Peace”, supported by the State Commission on Human Rights. 2002 Professor of the Gnostic Movement A.C. She opened free educational centers in 22 municipalities of 5 States of the Republic. In 2008 she was appointed representative of the Gnostic Movement in Russia, where 9 Mexican Gnostic teaching centers have already been opened. In 2018 the World Philosophy Forum awarded her the certificate of citizen of the world. 2020-2021, during the COVID – 19 pandemic, she taught online; the “Self-Knowledge Workshop” for Metrobús México employees. In 2021, the Russian Parliamentary Club gave her the position of representative of Mexico in the women's section, and she received a gold medal from the UNESCO Club of Piraeus and the islands for the dissemination of Mexican culture in international cultural events and festivals. In 2022, she gave lectures in Chetumal and Quintana Roo, for the DIF, the Army, the Navy and the municipal Police. 2022-2024 she collaborated with the Mexican Embassy in Russia in the area of Culture. In 2023, she received the GUSI peace prize in Manila, Philippines. In 2024, she participated in the first International Symposium Reimagining Education from a Gross National Happiness (GNH) perspective in Paro, Bhutan. She represented Mexico at the Latin American and Caribbean Festival in Moscow with the Tonanzin ensemble, in addition to giving lectures and workshops on Mexican culture. She received a medal and was named an honorary academic of the University of Turon, Uzbekistan. Languages: Spanish, English, Russian, Italian, French and basic Arabic.

Yuga Cycle and End Times

In Hindu cosmology, the Yuga cycle, also known as the Chatur Yuga or Maha Yuga, refers to a recurring cycle of four distinct ages or yugas. These yugas are: Satya/Krita Yuga, Treta Yuga, Dwapara Yuga, and Kali Yuga. Each cycle lasts for 4,320,000 years and is believed to represent a period of decline in dharma (righteousness) and moral order, with each yuga being progressively shorter than the previous one.

Here's a more detailed breakdown:

- **Satya/Krita Yuga:**

The first and longest yuga, considered the golden age of humanity, where people are believed to be spiritually advanced and virtuous. It lasts for 1,728,000 years.

- **Treta Yuga:**

The second yuga, where people are said to be more focused on external rituals and actions, and dharma is somewhat diminished. It lasts for 1,296,000 years.

- **Dwapara Yuga:**

The third yuga, characterized by increasing materialism and self-interest, and a further decline in dharma. It lasts for 864,000 years.

- **Kali Yuga:**

The current yuga, believed to be the shortest and the most challenging, marked by conflict, sin, and a general decline in moral values. It lasts for 432,000 years.

The Cycle:

- The cycle begins with Satya Yuga, which is the highest and most prosperous age.
- Then, it progresses through Treta, Dwapara, and Kali Yugas, where moral and spiritual order declines.
- After Kali Yuga, the cycle restarts with Satya Yuga, representing a return to the initial state of purity and righteousness.

Significance:

The Yuga cycle is a framework for understanding the cyclical nature of time and the ebb and flow of dharma and morality in the universe. It is believed that the present age, Kali Yuga, is nearing its end, and a new Satya Yuga will begin, ushering in a fresh cycle of dharma and progress.

Yuga Ends:

As per scriptures, yuga ends due to conflicts among people, ecological imbalance, natural disaster leading to total annihilation. Conflicts among people are usually carried out with the strength of destructive devices.

During Satya Yuga, humans were fighting with the strength of knowledge called 'Gnana Balam' which could also be called as 'Information War'.

During Treta Yuga, humans were fighting with 'Mantra Balam', which could also be called 'Sonic War'.

During Dwapara yuga, humans were fighting with 'Tantra Balam', which is also called 'Magic or Proxy War'.

During Kali yuga, humans are fighting with 'Yantra Balam', which is also called 'Electronic (Silicon) War'.

Every yuga ends because of greed, anger, anxiety, ego, characterlessness, misconceptions and diabolic geopolitical conflicts.

All these are bound to happen as decided by planetary movements, and Divine Will !

Signs of the End Times and Knowing When the End Is Near – a Christian Perspective

<https://www.crosswalk.com/church/pastors-or-leadership/christianity-questions-answers/known-when-the-end-is-near.html>

Any entity, be it physical or philosophical, which has a beginning has to end and this is the TRUTH advocated by the concept of TIME. Alternatively, the concept of time is perceived by a conscious observer only through the triple <Appearance, Sustenance, Disappearance> of OBSERVABLES.

E. G. Rajan
