

IAPIC International Conference - 2025

Science and Spirituality for Global Peace and Harmony.

April 9th - 12th, 2025

RECOMMENDATIONS AND CONCLUSIONS

The IAPIC International Conference - 2025 had a total of 39 presentations, both online and in person.

It was not just a conference, but a grace-filled celebration, which grew day after day in the union of thoughts, teaching-learning, and experiences, imbued with respect, discipline, and cooperation, which wove in our consciences and hearts understanding and bonds of friendship, integrated by a single goal: to achieve world peace and harmony among humankind.

During this brief but divine and unforgettable time, the cosmic forces of nature filled our spirit and soul with a power, love, and understanding impossible to describe, for it is certain that they were destined by divine will.

The spiritual energy, brilliance, and depth of philosophical and scientific thought permeated the audience, taking us on a journey into mysticism to discover ancient Hindu sacred science and its relationship with other nations, and into the future to see our destiny as humanity if we do not change our course.

The main protagonists of this great conference were wisdom and the desire to share lifelong knowledge, where the enthusiasm and effort of all the speakers in sharing their presentations, work, and research were always highlighted.

However, the reality of the moment is that the global political landscape makes the urgent need for peace even more imperative, amidst contradictory ideas between nations, religions, and economic and political wars.

The recommendations of the conference are presented below for your information and for the necessary future actions to integrate science and spirituality in pursuit of world peace.

INTERNATIONAL RECOMMENDATIONS

USA:

Former White House Chief of Staff **Scot Faulkner** expressed his enthusiasm and recommended that India, Russia, and the United States join forces to unite the world in pursuit of peace and harmony, with science and spirituality as their fundamental pillars. The leaders of these nations can unite for lasting peace and establish a world order.

Dr. Kattesh Katti, the father of green technology from Columbia, Missouri, recommended that nanotechnology-based Ayurvedic medicines could holistically transform the healing process of medical treatment, offering better and more affordable treatment in the face of ever-rising medical costs worldwide.

RUSSIA Academy of Sciences:

Professor Alexey Semenov, Member of the Russian Academy of Sciences and the Russian Academy of Education, spoke about constructivism and the new dimension of mathematics within Artificial Intelligence. He also proposed a new direction in mathematics-based learning technology in the digital age. He emphasized the importance of early childhood education based on art, science, and technology so that children can solve problems through mathematics and develop their creativity.

PhD. Andrey Nechesov, Head of the Research Department of the Artificial Intelligence Center at Novosibirsk State University, Russia, proposed the creation of the International Artificial Intelligence Corporation, called **Markov International Artificial Intelligence Corporation**, in recognition of its contributions in mathematics and logic.

PhD. Georgy Tolokonnikov, Correspondent for the Russian Academy of Sciences, explained the radical importance of Markov Towers as the founding concept of AI in mathematics and logic. He emphasized the importance of promoting the study and development of Markov Towers. He suggested that an Indo-Russian Academy of Sciences for advanced research and development in Mathematical and Engineering Sciences, Artificial Intelligence, Quantum Computing, Space Technology, Digital Food Initiatives, Digital Health Initiatives and Digital Security Initiatives to be established in India. He also suggested that the participants and organizers of the Conference take part in organizing and holding the World Congress "Systems Theory, Algebraic Biology, Artificial Intelligence: Mathematical Foundations and Applications" (Congress) in 2025, and also consider holding the Congress in India in 2027".

Prof. Dr. Sci. Sergey Petoukhov, Head of the Biochemical Systems Research Laboratory at the Research Institute of Mechanical Engineering of the Russian Academy of Sciences, recommended in his topic "Universal Symmetry Regularities and Fractals in Genomic DNA and Its Binary-Genomic Numbers: Consciousness and Genetic Intelligence," his conclusion: The algebraic harmony of genomic probabilities, presented in the symmetrical characteristics of huge binary-genomic numbers, reflects some provisions on fractal structures of ancient Indian philosophy. He also commented on his second topic, "Quantum Bioinformatics and Ancient Indian Philosophy: Cyclic Physiology, Cyclic Codes, and Algebraic-Logical Peculiarities of the Genetic Code System," which is significant and promising for future studies leading to new approaches in bioinformatics, quantum computing, artificial intelligence, and biotechnology.

Dr. Inessa Minenko, Professor at the Department of Sports Medicine and Medical Rehabilitation. I.M. Sechenov First Moscow State Medical University. She recommended using new Russian technology in medical science, applicable to traditional medicine, as an alternative and holistic approach to electromagnetism.

WORLD PHILOSOPHICAL FORUM

The World Philosophical Forum was represented by Russians Dr. Irina Bondar and Elena Chadaeva, Syrian PhD Nada Al Ali, and Mexican Zyomara Briseida Delgado Reynoso.

Elena Chadaeva promoted the importance of developing family values and gave a beautiful artistic presentation that amazed those present with its beauty and depth, reminding us of the divine origin of our consciousness.

Dr. Irina Bondar spoke about the importance of philosophy and science in achieving balance in humanity, explaining that some of humanity's greatest discoveries have been through direct mystical experiences of consciousness, such as Mendeleev's periodic table, which he received in a dream, and experiences like this one, happen all over the world.

For her part, the Syrian representative, Nada Al Ali, spoke in favor of peace, showing the reality that many Syrian families currently experience due to the war.

Meanwhile, Mexico's representative, **Zyomara B. Delgado Reynoso**, explained the importance of sexual education from childhood as a solution to humanity's problems, based on practices such as Pranayama and Tantrism, supported by Hindu and Mexican literature that connects these great nations.

ONLINE RECOMMENDATIONS.

The use of Artificial Intelligence to treat Autism. The use of telepathy in education for autistic children. Through the use of mental or telepathic waves, they create more spiritual systems for children to transmit and receive information.

The presentation by **Dr. Sergey Shushardzhan** from Russia explained how classical music influences the blood and it can cure diseases and even rejuvenate the human body.

NATIONAL RECOMMENDATIONS.

Professor Rajan explained in his lecture: The image decoding system is capable of detecting objects within the image, which can be anything from a banknote to a photograph; in reality, any image can be decoded. He also explained Artificial Intelligence, applicable to air defense system tactics, such as drones, which can detect only the target without damaging other objects or beings. But the most important aspect of his lecture was the proposal for an anti-nuclear shield.

Great Hindu spiritual leaders filled the conference room with their wisdom, urging participants to embody truth and conscious work, patiently explaining philosophical doctrine and the path to complete conscious awakening and integration with the universal consciousness, also known as GOD.

There were presentations that explained the importance of mathematical studies in medical science, criminology, finance, and in general in the different areas of human life, as well as how to improve our social and personal conditions.

Leading physicians spoke about the importance of Ayurvedic medicine and holistic practices, which yield surprising results in curing many diseases.

A very unique conference was based on models of intergalactic spacecraft described in the sacred Sanskrit literature of the Vedas and Ramayana, which were tested at NASA. These spacecrafts are anti-gravity, use solar energy, and can travel at high speeds, either in the past or in the future.

We thank everyone present at this conference for their recommendations for peace and harmony on our planet.

CONCLUSIONS

The technical articles by prominent American, Russian, Armenian, Singaporean, and Indian scientists contributed greatly to the conference and highlighted the need to improve systems for advanced technologies in university curricula worldwide.

Spiritual leaders from India, the World Philosophical Forum, represented by Russians, Mexican, Syrian, and other organizations, showed the right path in the deliberations and emphasized the need for spirituality for world harmony and peace, utilizing and collaborating with scientific advances.

It was concluded that only when science and spirituality go hand in hand will there be harmony and peace in the world. This is a clear and powerful message for sustainable and peaceful coexistence in the world order.

SPECIAL THANKS TO OUR CONTRIBUTORS

Without a doubt, it is important to emphasize our most sincere thanks as a show of respect and admiration for an exemplary man such as the honorable and wise **Sri Rajan Garu**. A visionary man in this era of Kali Yuga. His spiritual presence, his unparalleled ability to transform complex truths into simple and joyful practices, and his profound compassion for all beings

inspired all of us present at the conference to embark on the path of service to humanity and the inner self-realization of the Being. His clarity of thought, purity of intention, discipline in action, and his unifying vision of harmony and love are an exceptional blessing for humanity and a divine gift for the world. We would also like to take this opportunity to thank your distinguished wife, **Madame G. Chitra**, for her presence, a beacon of tolerance, wisdom and peace radiating through her serene and peaceful gaze.

Thanks to all those responsible for the successful realization of the conference for the sake of WORLD PEACE AND HARMONY. It is clear that from the organizers to the volunteers, from the speakers to the silent collaborators, each played a fundamental role in making this a memorable, moving, and very fruitful event.

Finally, we hope that in the future, conscious cooperation can be achieved among different nations such as the USA, Russia, Syria, Singapore, Mexico, and later the entire world, to change the destiny of humanity and achieve the long-awaited peace so desired by many peoples of the world.

This conference would not have been possible without the support of these worthy institutions:

Academy of Science and Academy of Engineering (Russia)

Pentagram Technologies India and US LLC (USA)

Pentagram Research (UK)

Best Society (India)

PRC Global Technologies INC. (Canada)

World Philosophical Forum - WPF

TechnoGraam Incubation Council

Sri Chaitanya Saraswat Institute

Volunteers during the Congress

Om Shanti Shanti Shanti, hello. May peace rule the world.
